- (1) Pursuant to SEC rules regarding convenience translations, Russian ruble (RUB) amounts have been translated into U.S. dollars at a rate of RUB 64.7347 to \$1.00, the official exchange rate quoted as of March 31, 2019 by the Central Bank of the Russian Federation.
- (2) The following measures presented in this release are “non-GAAP financial measures”: ex-TAC revenues; adjusted EBITDA; adjusted EBITDA margin; adjusted ex-TAC EBITDA margin; adjusted net income; adjusted net income margin and adjusted ex-TAC net income margin. Please see the section headed “Use of Non-GAAP Financial Measures” below for a discussion of how we define these measures, as well as reconciliations at the end of this release of each of these measures to the most directly comparable U.S. GAAP measures.
- (3) On April 27, 2018, Yandex and Sberbank formed a joint venture based on the Yandex.Market platform. Since that date, each of Yandex and Sberbank hold an equal number of the outstanding shares in Yandex.Market, with 10% of outstanding shares allocated to management and an equity incentive pool. Accordingly, starting April 27, 2018, we deconsolidated Yandex.Market from Yandex’s consolidated financial results and, under the equity method of accounting, we record our share of Yandex.Market’s financial results within the income/(loss) from equity method investments line in the consolidated statements of income. Financial results excluding Yandex.Market exclude the results of Yandex.Market and Yandex’s share of Yandex.Market’s net loss after the deconsolidation from the three months periods ended March 31, 2018 and 2019.

Our segment disclosure is now available in the Segment financial results table below Income from operations.

Consolidated revenues breakdown

<i>In RUB millions</i>	Three months ended March 31,		
	2018	2019	Change
Online advertising revenues:			
<i>Yandex properties</i>	17,475	20,912	20%
<i>Advertising network</i>	5,365	6,128	14%
Total online advertising revenues	22,840	27,040	18%
Revenues related to Taxi segment	3,116	7,624	145%
Other	617	2,620	325%
Total revenues	26,573	37,284	40%

<i>In RUB millions, excluding Yandex.Market</i>	Three months ended March 31,		
	2018	2019	Change
Online advertising revenues			
<i>Yandex properties</i>	16,289	20,912	28%
<i>Advertising network</i>	5,312	6,128	15%
Total online advertising revenues	21,601	27,040	25%
Revenues related to Taxi segment	3,116	7,624	145%
Other	951	2,620	175%
Total revenues	25,668	37,284	45%

Online advertising revenues grew 18% in Q1 2019 compared with Q1 2018 and generated 73% of total revenues. Online advertising revenues include revenues derived from performance and brand advertising on Yandex properties and in our advertising network. **Excluding revenues of Yandex.Market** from Q1 2018, online advertising revenues grew 25% in Q1 2019 compared with Q1 2018.

Online advertising revenues from Yandex properties increased 20% in Q1 2019 compared with Q1 2018 and accounted for 56% of total revenues. **Excluding revenues of Yandex.Market** from Q1 2018, online advertising revenues from Yandex properties increased 28% in Q1 2019 compared with Q1 2018.

Online advertising revenues from our advertising network increased 14% in Q1 2019 compared with Q1 2018 and accounted for 16% of total revenues. The increase was primarily driven by the continuing growth of contribution from medium and small partners.

Revenues related to Taxi segment grew 145% in Q1 2019 compared with Q1 2018 and accounted for 20% of total revenues. This increase was mainly due to the growth of our ridesharing business driven by the increase in the number of rides, commission rates and incentives optimization, as well as due to the rapid growth of our corporate Taxi, which we recognize on a gross basis, and food delivery businesses.

Other revenues grew 325% in Q1 2019 compared with Q1 2018 and amounted to 7% of total revenues. The growth was primarily driven by our car-sharing service Yandex.Drive, music service Yandex.Music and to a lesser extent by our initiatives related to IoT (stands for Internet of Things).

Consolidated Operating Costs and Expenses

Yandex's operating costs and expenses consist of cost of revenues, product development expenses, sales, general and administrative expenses (SG&A) and depreciation and amortization expenses (D&A). Apart from D&A, each of the above expense categories include personnel-related costs and expenses, relevant office space rental, and related share-based compensation expense. Increases across all cost categories reflect investments in overall growth. In Q1 2019 Yandex's headcount decreased by 138 full-time employees, mainly due to headcount reclassification, which we continued to implement to ensure consistency in internal reporting for positions that we treat as outsource labor. The total number of full-time employees was 8,629 as of March 31, 2019, down by 2% compared with December 31, 2018, and up 6% from March 31, 2018.

Cost of revenues, including traffic acquisition costs (TAC)

In RUB millions	Three months ended March 31,		
	2018	2019	Change
TAC:			
Related to the Yandex advertising network	3,168	3,623	14%
Related to distribution partners	1,149	1,719	50%
Total TAC	4,317	5,342	24%
<i>Total TAC as a % of total revenues</i>	16.2%	14.3%	
<i>Costs related to Taxi segment</i>	691	2,409	249%
<i>Costs related to Taxi segment as a % of revenues</i>	2.6%	6.5%	
Other cost of revenues	1,704	3,834	125%

<i>Other cost of revenues as a % of revenues</i>	6.4%	10.3%	
Total cost of revenues	6,712	11,585	73%
<i>Total cost of revenues as a % of revenues</i>	25.3%	31.1%	

TAC grew 24% in Q1 2019 compared with Q1 2018 and represented 14.3% of total revenues, 190 basis points lower than in Q1 2018 and 160 basis points lower compared with Q4 2018 as a result of revenue mix effect.

Costs related to Taxi segment increased 249% compared with Q1 2018. The growth was primarily driven by our outsourced costs and services provided to Taxi corporate clients, the logistics costs related to food delivery. We are the principal in transactions with our B2B taxi clients, therefore, we recognize both revenues and cost of revenues on a gross basis. Costs related to Taxi corporate clients represent payments we make to the drivers to fulfill our contract obligations to the B2B clients.

Other cost of revenues in Q1 2019 increased 125% compared with Q1 2018, mainly reflecting the growth of costs related to Yandex.Drive, our IoT initiatives as well as our investments in music and video content within Media Services.

Product development

<i>In RUB millions</i>	<i>Three months ended March 31,</i>		
	<i>2018</i>	<i>2019</i>	<i>Change</i>
<i>Product development</i>	5,803	6,706	16%
<i>As a % of revenues</i>	21.8%	18.0%	

Product development expenses grew more slowly than revenues and mainly reflected the growth of share-based compensation, salary increases as well as new hires in Q1 2019. Excluding Yandex.Market from Q1 2018, product development expenses grew 26% in Q1 2019 compared with Q1 2018.

Sales, general and administrative (SG&A)

<i>In RUB millions</i>	<i>Three months ended March 31,</i>		
	<i>2018</i>	<i>2019</i>	<i>Change</i>
Sales, general and administrative	8,009	10,351	29%
<i>As a % of revenues</i>	30.1%	27.8%	

SG&A expenses grew 29% in Q1 2019 compared to Q1 2018. The growth was mainly driven by our investments in advertising and marketing to support our business units, primarily Classifieds, Taxi, Media Services, and our core business, as well as by the growth of personnel costs as a result of salary increases and new hires. Excluding Yandex.Market from Q1 2018, SG&A expenses grew 37% in Q1 2019 compared with Q1 2018.

Share-based compensation (SBC) expense

SBC expense is included in each of the cost of revenues, product development, and SG&A categories discussed above.

<i>In RUB millions</i>	Three months ended March 31,		
	2018	2019	<i>Change</i>
SBC expense included in cost of revenues	36	68	89%
SBC expense included in product development	1,146	1,432	25%
SBC expense included in SG&A	451	619	37%
Total SBC expense	1,633	2,119	30%
<i>As a % of revenues</i>	6.1%	5.7%	

Total SBC expense increased 30% in Q1 2019 compared with Q1 2018. The growth was primarily related to new equity-based grants made in 2018-2019.

Depreciation and amortization (D&A) expense

<i>In RUB millions</i>	Three months ended March 31,		
	2018	2019	<i>Change</i>
Depreciation and amortization	2,890	3,257	13%
<i>As a % of revenues</i>	10.9%	8.7%	

D&A expense increased 13% in Q1 2019 compared with Q1 2018. The D&A expense increase primarily reflects our investments in servers and data center equipment, as well as the increase of our intangible assets from businesses acquisitions completed in 2018.

Income from operations

<i>In RUB millions</i>	Three months ended March 31,		
	2018	2019	<i>Change</i>
Income from operations	3,159	5,385	70%

Income from operations increased 70% in Q1 2019 compared with Q1 2018.

Segment financial results

Following the revision of our organizational structure and financial disclosure, starting in Q1 2019 we introduced the following changes to our segments under which we reported our quarterly financial results in 2018, in order to better reflect operational performance of our businesses:

- We transferred Geolocation Services and Yandex.Education from Search and Portal segment to Other Bets and Experiments segment, while moving Yandex.Health, which we previously reported in Experiments, into Search and Portal;
- We have renamed our Experiments to Other Bets and Experiments category, which includes Zen, Yandex.Drive, Geolocation Services, Yandex.Cloud and Yandex.Education;
- We changed the approach to Zen's revenue recognition. Now we recognize payments of Zen to Yandex.Browser, Yandex Homepage and Yandex Search app as traffic acquisition costs rather than revenue elimination. This change insures consistency in internal reporting.
- We changed our approach to ICO allocation related to office rent expenses and administrative support services of our business units to provide consistent disclosure with our internal reporting. We now net these expenses within Search and Portal segment at operating costs level as opposed to treating business units share of rent expenses as ICO revenue of Search and Portal.

Prior periods were restated to conform to the current year presentation. The historical data is available in the supplementary slides accompanying our financial release.

*IoT stands for Internet of Things

**Our E-commerce segment revenues include revenues of Yandex.Market through April 27, 2018. As a result of deconsolidation, we record our share of Yandex.Market's financial results within the income/(loss) from equity method investments line in the consolidated statements of income.

- Search and Portal segment offers a broad range of services in Russia, Belarus, Kazakhstan, Uzbekistan and Turkey, other than those described below. Since Q1 2019 our Search and Portal segment also includes Yandex.Health, previously reported in Other Bets and Experiments;
- E-commerce segment includes Yandex.Market for the period prior to April 27, 2018, the date of the completion of the Yandex.Market joint venture between Yandex and Sberbank;
- Taxi segment includes our Taxi business (including Yandex.Taxi and Uber in Russia and neighboring countries), Food Delivery business (including Yandex.EATs, UberEATs and Yandex.Chef, a meal kit subscription service) and Self-Driving Cars division;
- Classifieds segment includes Auto.ru, Yandex.Realty and Yandex.Jobs;
- Media Services segment includes KinoPoisk, Yandex.Music, Yandex.Afisha, Yandex.TV program, our production center Yandex.Studio and our subscription service Yandex.Plus;
- Other Bets and Experiments category includes Zen, Yandex.Cloud, Yandex.Drive, Geolocation Services and Yandex.Education. Geolocation Services and Yandex.Education previously were a part of our Search and Portal segment;
- Eliminations in our revenues represent the elimination of transactions between the reportable segments, primarily related to advertising. Eliminations related to our adjusted EBITDA mainly reflect reallocation of a portion of Search and Portal D&A expenses related to leasehold improvements to office rent expenses of our business unites.

Adjusted EBITDA increased 40% in Q1 2019 compared with Q1 2018.

Adjusted EBITDA excluding Yandex.Market increased 37% in Q1 2019 compared with Q1 2018. The growth was mainly driven by the solid revenue growth of Search and Portal and improved adjusted EBITDA of our Taxi segment, which were slightly offset by our investments in other businesses and IoT initiatives.

Adjusted EBITDA of Taxi was negative RUB 116 million in Q1 2019. The positive adjusted EBITDA of our ride-sharing business was offset by our investments in food delivery and autonomous vehicles.

Interest income in Q1 2019 was RUB 827 million, compared with RUB 708 million in Q1 2018.

Interest expense in Q1 2019 was RUB 1 million, down from RUB 221 million in Q1 2018.

Foreign exchange loss in Q1 2019 was RUB 279 million, compared with a foreign exchange loss of RUB 482 million in Q1 2018. This loss reflects the appreciation of the Russian ruble during Q1 2019 from RUB 69.4706 to \$1.00 on December 31, 2018, to RUB 64.7347 to \$1.00 on March 31, 2019. Yandex's Russian operating subsidiaries' functional currency is the Russian ruble, and therefore changes due to exchange rate fluctuations in the ruble value of these subsidiaries' monetary assets and liabilities that are denominated in other currencies are recognized as foreign exchange gains or losses within the other loss, net line in the

condensed consolidated statements of income. Although the U.S. dollar value of Yandex's U.S. dollar-denominated assets and liabilities was not impacted by these currency fluctuations, they resulted in a downward revaluation of the ruble equivalent of these U.S. dollar-denominated monetary assets and liabilities in Q1 2019.

Income tax expense for Q1 2019 was RUB 2,214 million, up from RUB 1,395 million in Q1 2018. Our effective tax rate of 41.5% in Q1 2019 was in line with Q1 2018. Adjusted for SBC expense, deferred tax asset valuation allowances provided on operations of our Uber and Food Delivery businesses acquired in late 2017 and early 2018, our effective tax rate for Q1 2019 was 27.6%, compared with 23.5% for Q1 2018 as adjusted for SBC expense and similar provisions in that year. The increase in the adjusted effective tax rate was primarily driven by certain additional valuation allowances provided in Q1 2019.

Net income was RUB 3.1 billion (\$48.3 million) in Q1 2019, up 69% compared with Q1 2018.

Adjusted net income in Q1 2019 was RUB 5.4 billion (\$84.0 million), a 36% increase from Q1 2018. Excluding Yandex.Market, adjusted net income increased 49% in Q1 2019 compared to Q1 2018.

Adjusted net income margin was 14.6% in Q1 2019, compared with 15.1% in Q1 2018.

As of March 31, 2019, Yandex had **cash, cash equivalents and term deposits** of RUB 73.6 billion (\$1,137.5 million), including cash and cash equivalents of Yandex.Taxi in total amount of RUB 26.2 billion (\$404.5 million).

Net cash flow provided by operating activities for Q1 2019 was RUB 10.5 billion (\$162.6 million) and **capital expenditures** were RUB 2.0 billion (\$30.6 million).

Redeemable noncontrolling interests presented in our condensed consolidated balance sheets relate to the equity incentive arrangements we have made available to the senior employees of the Taxi and Classifieds segments, pursuant to which such persons are eligible to acquire depositary receipts, or receive options to acquire depositary receipts, which entitle them to economic interests in the respective business unit subsidiaries.

The **total number of shares issued and outstanding** as of March 31, 2019 was 325,657,474 including 287,908,815 Class A shares, 37,748,658 Class B shares, and one Priority share and excluding 4,658,840 Class A shares held in treasury and all Class C shares outstanding solely as a result of the conversion of Class B shares into Class A shares. All such Class C shares were cancelled.

There were also employee share options outstanding to purchase up to an additional 3.5 million shares, at a weighted average exercise price of \$35.40 per share, 1.3 million of which were fully vested; equity-settled share appreciation rights (SARs) for 0.2 million shares, at a weighted average measurement price of \$32.63, all of which were fully vested; and restricted share units (RSUs) covering 13.4 million shares, of which RSUs to acquire 5.1 million shares were fully vested. Equity awards in respect of business unit subsidiaries are described under Redeemable noncontrolling interests above.

Financial outlook

Based on our recent performance, we currently expect our ruble-based revenues excluding Yandex.Market to grow in the range of 30% to 34% for the full year 2019 compared with 2018.

Based on the recent performance of Search and Portal, we now expect our Search and Portal ruble-based revenue to grow in the range of 19% to 21% in the full year 2019 compared with 2018.

This outlook reflects our current view, based on the trends that we see at this time, and may change in light of market and economic developments in the business sectors and jurisdictions in which we operate.

USE OF NON-GAAP FINANCIAL MEASURES

To supplement our condensed consolidated financial statements, which are prepared and presented in accordance with U.S. GAAP, we present the following non-GAAP financial measures: ex-TAC revenues, adjusted EBITDA, adjusted EBITDA margin, adjusted ex-TAC EBITDA margin, adjusted net income, adjusted net income margin and adjusted ex-TAC net income margin. The presentation of these financial measures is not intended to be considered in isolation or as a substitute for, or superior to, the financial information prepared and presented in accordance with U.S. GAAP. For more information on these non-GAAP financial measures, please see the tables captioned “Reconciliations of non-GAAP financial measures to the nearest comparable U.S. GAAP measures”, included following the accompanying financial tables. We define the various non-GAAP financial measures we use as follows:

- **Ex-TAC revenues** means U.S. GAAP revenues less total traffic acquisition costs (TAC)
- **Adjusted EBITDA** means U.S. GAAP net income plus (1) depreciation and amortization, (2) SBC expense, (3) accrual of expense related to the contingent compensation that may be payable to employees in connection with certain business combinations, (4) interest expense, (5) other loss, net and (6) income tax expense, less (1) interest income and (2) (income)/loss from equity method investments
- **Adjusted EBITDA margin** means adjusted EBITDA divided by U.S. GAAP revenues
- **Adjusted ex-TAC EBITDA margin** means adjusted EBITDA divided by ex-TAC revenues
- **Adjusted net income** means U.S. GAAP net income plus (1) SBC expense adjusted for the income tax reduction attributable to SBC expense, (2) accrual of expense related to the contingent compensation that may be payable to certain employees in connection with certain business combinations, (3) foreign exchange losses adjusted for reduction in income tax attributable to foreign exchange losses and (4) amortization of debt discount related to our convertible debt adjusted for the related reduction in income tax
- **Adjusted net income margin** means adjusted net income divided by U.S. GAAP revenues
- **Adjusted ex-TAC net income margin** means adjusted net income divided by ex-TAC revenues

These non-GAAP financial measures are used by management for evaluating financial performance as well as decision-making. Management believes that these metrics reflect the organic, core operating performance of the company, and therefore are useful to analysts and investors in providing supplemental information that helps them understand, model and forecast the evolution of our operating business.

Although our management uses these non-GAAP financial measures for operational decision-making and considers these financial measures to be useful for analysts and investors, we recognize that there are a number of limitations related to such measures. In particular, it should be noted that several of these

measures exclude some recurring costs, particularly share-based compensation. In addition, the components of the costs that we exclude in our calculation of the measures described above may differ from the components that our peer companies exclude when they report their results of operations.

Below we describe why we make particular adjustments to certain U.S. GAAP financial measures:

TAC

We believe that it may be useful for investors and analysts to review certain measures both in accordance with U.S. GAAP and net of the effect of TAC, which we view as comparable to sales commissions and bonuses but, unlike sales commissions and bonuses, are not deducted from U.S. GAAP revenues. By presenting revenue, adjusted EBITDA margin and adjusted net income margin net of TAC, we believe that investors and analysts are able to obtain a clearer picture of our business without the impact of the revenues we share with our partners.

SBC

SBC is a significant expense item, and an important part of our compensation and incentive programs. As it is a non-cash charge, however, and highly dependent on our share price at the time of equity award grants, we believe that it is useful for investors and analysts to see certain financial measures excluding the impact of these charges in order to obtain a clearer picture of our operating performance.

Acquisition-related costs

We may incur expenses in connection with acquisitions that are not indicative of our recurring core operating performance. In particular, we are required under U.S. GAAP to accrue as expense the contingent compensation that is payable to certain employees in connection with certain business combinations. We eliminate these acquisition-related expenses from adjusted EBITDA and adjusted net income to provide management and investors a tool for comparing on a period-to-period basis our operating performance in the ordinary course of operations.

Foreign exchange losses

Because we hold significant assets and liabilities in currencies other than our Russian ruble operating currency, and because foreign exchange fluctuations are outside of our operational control, we believe that it is useful to present adjusted net income and related margin measures excluding these effects, in order to provide greater clarity regarding our operating performance.

Amortization of debt discount

We also adjust net income for interest expense representing amortization of the debt discount related to our convertible notes issued in Q4 2013 and Q1 2014 which matured in Q4 2018. We have eliminated this expense from adjusted net income as it is non-cash in nature and is not indicative of our ongoing operating performance.

The tables at the end of this release provide detailed reconciliations of each non-GAAP financial measure we use to the most directly comparable U.S. GAAP financial measure.
